

Experiment 5: Implementing Controls & Compensating Control Attestation

Aim

To implement security controls in Eramba and verify their audit/attestation status.

Procedure

- 1. Go to **Control Catalog** → **Internal Controls**.
- 2. Create/import internal controls.
- 3. Select a control such as **Privileged Account Monitoring**.
- 4. Open **Edit** → **Audits**.
- 5. Set the audit date and select **Audit Owner** and **Audit Evidence Owner**.
- 6. Verify the audit methodology and success criteria.
- 7. Save the control.

Output

10 internal controls were created, and an audit/attestation plan was configured for **Privileged Account Monitoring**.
